

HI TEMP POOL HEATING SOLUTIONS

SWIMMING POOL HEAT PUMPS ECO SERIES

With a complete range of models from 5.4kW to 26kW, HI TEMP RESIDENTIAL POOL HEAT PUMPS ECO SERIES is widely welcomed in most markets. In the working process of absorbing free heat from the air and transferring it to water, this series of heat pumps ensure constant and stable pool water temperature for you.

FEATURES

COST EFFECTIVE

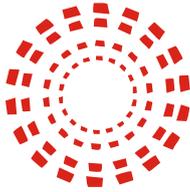

HI TEMP ECO SERIES achieves its best performance in summer. The COP of this series is as high as 5.6 at working condition of 24°C/19°C (DB/WB), which saves you at least 80% energy compared with traditional electric swimming pool heating.

COP5.6
at 24°C/19°C
(DB/WB)

MULTIPLE MODELS

HI TEMP ECO SERIES contains 6 models ranging from 5.4kW to 26kW, users can make use of their favourite choice for a perfect energy saving swimming pool heating application.

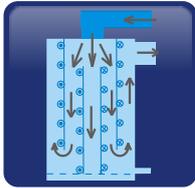

HI TEMP

POOL HEATING SOLUTIONS

DETAILS

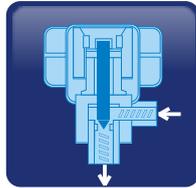

1. TWO TITANIUM COILS HEAT EXCHANGER

HI TEMP patented Two Titanium Coils Heat Exchanger features extended heat exchanging surface with higher efficiency.

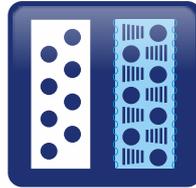

2. ELECTRIC EXPANSION VALVE

Smartly adjust the refrigerant flow rate, the units are sure to work with high efficiency at all time.

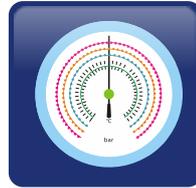

3. RIPPLE FIN AIR EXCHANGER

Heat exchanging surface extended, heat exchanging effect is improved and the risk of frosting is reduced.

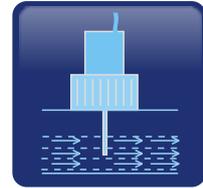

4. PRESSURE PROTECTION

With high pressure and low pressure protection, heat pumps are protected at inappropriate working conditions.

5. WATER FLOW SWITCH

The water flow switches designed by HI TEMP are with high sensitivity feature.
