THE ESKOM REBATE

The Eskom rebate for, all the systems which use a Powerzon-on flat plate collector, are capped at the highest rate. This means you are able to give your clients the best price for their water heating system.

- Powerzon will register you with Eskom as an accredited installer. This gives you the permission from Eskom to claim the rebate for all Powerzon systems.
- Eskom documents and barcode are available for the claiming and processing of the rebate.
- Hi Temp Solar Hot Water Systems also can facilitate in the processing of rebates for your clients if you are not an Eskom accredited solar installer. The process only requires an inspection of the water heating system.
- Hi Temp Solar Hot Water Systems can also facilitate the ceding of the rebate, so that the clients can have the rebate deducted from the initial cost of their system. This also makes the sale simpler, as the customer has less capital to outlay. This ceding of the rebate has a minor cost for processing, it is far simpler compared to the customer having to wait the 12 weeks for Eskom to reimburse them.

DELIVERIES

Hi Temp Solar Hot Water Systems will deliver your Powerzon collector anywhere in KZN and they will deliver the equipment at no cost with in 30km from Ballito. The pumps and controller are delivered at no cost only if they are purchased in conjunction with the Powerzon collector. Hi Temp Solar Hot Water Systems also stocks valves, fittings, trays and geyser. This system of delivery helps you save time and effort.

INSTALLING FOR YOU

Hi Temp Solar Hot Water Systems specializes in water heating installations and the sales of solar water heating equipment, therefore they can provide a seamless installation process for your company. This service is valuable when your installers are un reliable, unqualified or if your company just hasn't been registered for the Eskom rebate. Hi Temp Solar Hot Water Systems can assist with the following:

- The processing and ceding of the Eskom rebate. All of the documents required from the customer will be handled by Hi Temp Solar Hot Water Systems on your behalf.
- The Eskom rebate gets paid straight to Hi Temp Solar Hot Water Systems and therefore there is little capital which has to be paid over to us for the installation work.
- All components and materials are transported.
- The system will be installed according to the SANs regulations. This ensures that all of the precautions related to heating water have been attended to.
- The 2 year guarantee on the workmanship remains the responsibility of Hi Temp Solar Hot Water Systems. Your responsibility ends at the final payment to Hi Temp Solar Hot Water Systems.
- The warrantee for the components will go through Hi Temp Solar Hot Water Systems, lessening the burden on your company for any possible defects in the future.
- Hi Temp Solar Hot Water Systems has a flat installation cost and all the other components get charged at the exact rate you would normally purchase them. The installation kit also gets charged at the purchase price plus 10%. This way of processing an installation ensures you remain the main beneficiary of the sales profit.
- The cost of using Hi Temp Solar Hot Water Systems in most cases proves more profitable.
